

Lonicerin

Cat No: 25148 - 500 µg

General Data

Shipping:	dry ice
Formulation:	A crystalline solid
Purity:	≥98%

Product Overview

Lonicerin is a flavonoid that has been found in *L. japonica* and has diverse biological activities, including antioxidant, anti-inflammatory, and neuroprotective properties.^{45090,45091,45092} Lonicerin inhibits xanthine oxidase (IC₅₀ = 37.4 µg/ml) and scavenges 2,2-diphenyl-1-picrylhydrazyl (DPPH; Item No. 14805), hydroxyl, and superoxide radicals (IC₅₀s = 9.2, 236.8, and 143.9 µg/ml, respectively).^{45091} It reduces paw edema in a mouse model of *C. albicans* cell wall- and complete Freund's adjuvant-induced arthritis when administered at doses of 1 and 2 mg/kg three times every other day.^{45090} It also decreases nitric oxide (NO) production and T cell proliferation in vitro when used at concentrations of 20 and 40 µg/ml, respectively. Lonicerin is neuroprotective against glutamate-induced neurotoxicity in rat primary cortical neurons.^{45092}
