

Salmeterol-d₃ (xinafoate)

Cat No: 27191 - 500 µg

General Data

Shipping:	dry ice
Formulation:	A solid
Purity:	≥99% deuterated forms (d1-d3)

Product Overview

Salmeterol-d₃ is intended for use as an internal standard for the quantification of salmeterol (Item No. 16009) by GC- or LC-MS. Salmeterol is a long-acting β₂-adrenergic receptor agonist (β₂-AR; EC₅₀s = 0.79, 63.1, and 9.4 nM for β₂-, β₁-, and β₃-ARs, respectively).{25442} It inhibits electrically-stimulated contraction of isolated guinea pig trachea strips (EC₅₀ = 2.51 nM) and histamine-induced bronchoconstriction in guinea pigs via aerosol administration of doses ranging from 0.12 to 12 mM. {25442,42567} Salmeterol binds to an exosite domain of β₂-adrenergic receptors, producing a slow onset of action and prolonged activation.{25994} Formulations containing salmeterol have been used in the treatment of asthma, including exercise-induced asthma, and chronic obstructive pulmonary disease.
