## **Product Information**

## **Prion Protein Monoclonal Antibody - 12F10**

Cat No: A03221 - 200 Âμg

#### **General Data**

Shipping: Dry Ice

Formulation: lyophilized IgG with BSA

Host: Mouse

Antigen: This anti-Prion Protein Monoclonal Antibody was raised

against a human recombinant protein.

Clone: 12F10 Isotype: IgG2a

**Application(s):** Reconstitute the content of the vial in 1 mL of water.

For immunohistochemistry, the optimal working dilution must be determined empirically (currently between 0.1 and 1  $\mu$ g/mL). For western blot analysis of PrPc, dilute the antibody

to a final concentration of 1 µg/mL.

Specificity: PrPc

(+/-) Hamster, (+/-) Mouse, (+) Bovine, (+) Ovine, (+) Human

#### **Product Overview**

Prion Protein (PrP) and namely its abnormal isoform, partially resistant to proteinase K (PrPres), is the only specific molecular marker of the Transmissible Spongiform Encephalopathies (TSEs) such as Bovine Spongiform Encephalopathie (BSE) or its human form, the New Variant of Creutzfeld-Jakob disease.

This antibody recognises the protein sequence within amino acids 142-160 (human numbering).

FP/22/24

For research laboratory use only â€" Not for human diagnostic use.

Buyers agree to purchase the material subject to Purchasing Terms that can be found on our website. Seek appropriate training to safely handle this product under normal conditions. Use the recommended personal protective equipment to prevent chemical exposures.
