

Tenofovir-d₆

Cat No: 21071 - 500 µg

General Data

Shipping:	dry ice
Formulation:	A solid
Purity:	≥99% deuterated forms (d1-d6)

Product Overview

Tenofovir-d₆ is intended for use as an internal standard for the quantification of tenofovir (Item No. 13874) by GC- or LC-MS. Tenofovir is an analog of adenosine monophosphate that has antiviral activity.^{24520,24521} It is converted by cellular enzymes to tenofovir diphosphate, an obligate chain terminator that inhibits the activity of HIV reverse transcriptase and hepatitis B virus polymerase.^{24519,24528} Tenofovir diphosphate is a weak inhibitor of mammalian DNA polymerases α and β and mitochondrial DNA polymerase γ.^{24528} For in vivo and cell culture use, tenofovir is supplied as a water soluble prodrug in the form of tenofovir disoproxil (fumarate) (Item No. 16922), which increases the intracellular diphosphorylated compound >1,000-fold above the level attained with unmodified tenofovir.
